New York Nov. 17th 1873

My dear Mr Brewster

I have been trying to write to you for some time passed but have not till now found the chance. Owing to your kind information on stuffing birds I have been enabled to make quite a number of good birds and am now at work making a collection of all the birds on Long Island but I lack the right book for reference. When I was at Cambridge you told me the name of a book in which I could find the names and classifications of the birds of North America but I have forgotten what it was. Will you have the kindness to drop me a line enclosing the name of the book or such books as I may find useful. Next summer we shall hope to have a country place somewhere on Long Island and if we do ~~why~~ I shall expect a visit

Yours Rd. G.

from you and your dog in the shooting season. My dog has turned out splendidly and I never have taken so much pleasure in anything as I have in that dog. I have just finished setting up a pair of quail and they reflect great credit on my teacher.

Hoping to be in Cambridge some time this winter I am sincerely

Your friend

My dear Mr. Brewster

I have just received your kind letter of the 28th inst. & thank you for it.

The book you named first in your letter was the one I meant – Vol. 9. P. R.R. Report. –

I was exceedingly sorry to hear from Delano that you had not as yet recovered the use of your leg, but you must not be discouraged for I can't see any reason why time should not remedy the injury. My brother is suffering from a similar trouble in his wrist, he was thrown from his horse last spring and injured his wrist and it is almost useless

with my friends the Gremoughs and I shall take great pleasure in calling on you.

It gives me pleasure to hear your dog is doing so well, I heard from my cousin Mr. Lyman that you thought of selling him. <u>don't do it.</u> When a man has a good dog hold on to it for he may not get another as good for many years.

Thanking you again for your kind note I am

Very truly Yours.

now, he will not recover the use of it for more than a year yet I am sure. Bruises are very troublesome things to get over and sometimes last a number of years in this way: I bruised my shin bone a number of years ago to such an extent that I was in bed 6 weeks and did not walk for as many months, but after I was well to walk around the least touch on that leg would lay me up for a day or two and it remained in this extremely sensitive state for more than 18 months.

I have no doubt but that when you fell the hip was partially dislocated at least enough to strain severely if not break some of the muscles or cords which although they heal in a month or more take a great deal of time to recover their strength and quickness but it is sure to come in time.

I have watched my brothers wrist with a great deal of interest and I see the improvement week by week although he does not. The shooting on Long Island is remarkably poor this year and that luck of mine was an exception, I have been out several times since and not seen a feather.

There is always some shooting if you have a mind to walk for it, but it is rather scarce this year. I hope next fall will be better however and if so I hope we may have a little sport together.

Week after next I shall be in Cambridge staying

My dear Mr. Brewster

I have been so busy since my return from Cambridge that I have not had the time to write you to say how sorry I was not to come in again to see you, but all the time I stayed in Cambridge I was occupied with that play. I received a letter from my cousin Mr. Smith with whom I told you I went shooting on the Island ~~at~~ – He says until the law was up he had pretty good sport killing one day 22 quail & 4

partridges in about four hours. If the weather continues as open as now next fall we can expect some pretty fine sport-

I manage to keep my pup in pretty good condition considering he is in the city. Brooklyn I am sorry to say is very gay this winter and I find myself dragged out to all sorts of company I don't want to go to. I am not a party going man as perhaps you know & although I plead all sorts of indisposition it has no effect- I tell them I am too old, too young, have weak eyes, general debility but all to no effect, they say I look too well and out I have to go- Can you suggest any remedy any new way of getting out of society? How is the shooting about Cam.n and how is the leg? I hope you are able to use it more than when I was there.

Hoping to get a line from you when you have the opportunity I am

Yours truly
